'Towards a Common Future' renews
our Commonwealth vision and
commitment to building on the
individual and collective strengths of
all member countries to respond to
global challenges, and deliver a more
prosperous, secure, sustainable and
fair future for all of our citizens,
particularly our young people.
Commonwealth Day is 12 March 2018

Undersampling is a first idea towards countering class imbalance. Image under CC BY 4.0 from the Deep Learning Lecture.. One thing that you can do is for example resampling. The idea is that you balance the class frequencies by sampling classes differently, So, you can understand this means that you have to throw away a lot of the training data of the most frequent classes.

With IP routing there is a concept of "more specific route". 0.0.0.0/0 is the most common network with all addresses from 0.0.0.0 to 255.255.255.255. 192.168.0.0/16 is inside it, but is more specific, covering addresses between 192.168.0.0 and 192.168.255.255. 192.168.1.0/24 would be even more specific to it covering only addresses 192.168.1.0-192.168.1.255.

What does 0.0.0.0/0 means? : aws - reddit

After training for a total of 20 epochs at [0.01, 0.001] learning rates, validation accuracy rate reaches a plateau at about 96.84%. This is a huge jump from the initial 0.52734%. Finally, let's test our trained model with the test dataset!

A graph H is common if the number of monochromatic copies of H in a 2-edge-coloring of the complete graph is asymptotically minimized by the random coloring. The classification of common graphs is one of the most intriguing problems in extremal graph theory. We study this notion in the local setting as considered by Csóka, Hubai and Lovász [arXiv:1912.02926], where the graph is required to ...
