On the other hand kVA is a measure of apparent power:

Read Book 10 15 Kva 5 Kv And 15 Kv Ci 60 Hertz

it describes the total amount of power being used by a system, for example in a 100% efficient system kW would equal kVA exactly. However in reality electrical systems are not 100% efficient and so not all of the systems apparent power is being used for useful work output.
