This report provides a basic overview of the laws regarding children’s rights in a number of fields. The United Kingdom has a large number of laws protecting children and guaranteeing them basic rights - both for areas in which there is now an ‘entitlement’ such as education, as well as in areas in which they need rights to ensure protection, such as in the criminal justice system.

Most youth who come in conflict with the law have experienced some form of trauma, yet many justice professionals are ill-equipped to deal with the effects trauma has on youth and instead reinforce a system that further traumatizes young offenders while ignoring the needs of victims. By taking a trauma-informed perspective, this text provides a much-needed alternative—one that allows for interventions based on principles of healing and restorative justice, rather than on punishment and risk assessment. In addition to providing a comprehensive historical overview of youth justice in Canada, Judah Oudshoorn addresses the context of youth offending by examining both individual trauma—including its emotional, cognitive, and behavioural effects—and collective trauma. The author tackles some of the most difficult problems facing youth justice today, especially the ongoing cycles of intergenerational trauma caused by the colonization of Indigenous peoples and patriarchal violence, and demonstrates how a trauma-informed approach to youth justice can work toward preventing crime and healing offenders, victims, and communities. Featuring a foreword written by Howard Zehr, case stories from the author’s own work with victims and offenders, questions for reflection, and annotated lists of recommended readings, this engaging text is the perfect resource for college and university students in the field of youth justice.

Wilson/Dilullo/Bosse/Levendusky's AMERICAN GOVERNMENT: INSTITUTIONS AND POLICIES, ENHANCED, 16th Edition, combines excellent scholarship with practical examples and insight to give you a clear understanding of the U.S. government. The authors highlight current issues in American politics, focusing on the importance of governmental institutions, the historical development of procedures and policies as well as on who governs in the U.S. and to what ends. Up-to-date coverage includes changes during the Trump administration and results of the 2018 midterm elections. Links to contemporary debates on policy dynamics give you the opportunity to identify important issues in American politics, apply what you learn and maximize your comprehension.
