4efe Engine
The Toyota 4E-FE is a 1.3 l (1,331 cc, 81.22 cu-in) straight-four 4-stroke natural aspirated gasoline engine from Toyota E-family. The Toyota 4E-FE engine was manufactured from 1989, and was discontinued after 1999.

Toyota 4E-FE (1.3 l) engine: review and specs: service data

The 4EFTE engine was throttle-body fuel injected, had a displacement of 1,331 cc, and featured dual overhead camshafts. Ignition duty was handled by a distributor, and a Toyota-produced CT9 turbo provided the boost. An electrically controlled wastegate set the boost at either 5.8 psi or 9.4 psi, depending on the setting.

4EFTE Engine Specifications | It Still Runs

The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head.

The engine was retired from North American Corollas in 1991, although it continued to be available in the Geo Prizm GSi (sold through Chevrolet dealerships) from 1990 to 1992. All 4A-GE engines (including the 20-valve versions below) feature a forged crankshaft rather than a cheaper and more commonly used cast version.

They were popular "conversion" engines, replacing older engines, especially underperforming 3Es. The 4E-FE has three generations, the second producing less horsepower but higher torque due to altered exhaust manifolds and an engine control unit (ECU) upgrade while the third saw similar changes, once again reducing hp in favor of torque.

Information About The Toyota E Series Engine | Toyota—

Standard 4efe, 146k, recently serviced, genuine toyota air filter and denso plugs, new oil (5w30) and filter. New fuel filter engine end (not sure if one in the tank?) and new fuel tank. New coolant. Throttle cleaned. Clutch had 9mm left, was told had about a year of life left, get a whiff of clutch when giving it some, to be expected I guess.

It also has a harmonic damper instead of a normal crankshaft pulley. However, it does share the same head with the 4E-FE, 1st gen 5E-FE, and 5E-FHE. It produces the most stock horsepower of any E series engine. Over time this has become a very popular engine to swap into Tercels and Paseos due to its high stock power output.
