The student is expected to:
(A) Recognize that radiant energy from the Sun is transformed into chemical energy through the process of photosynthesis.

Ecology – Energy Flow, Environments, and Habitats [7th grade]

Ecology is the study of how living things interact with each other and their environment. Earlier this year we learned about the levels of organization within an organism: cell-tissue-organ-organ system-organism. Now we are looking at the levels of organization starting at an individual (i.e., organism)
