**Communications**

Military communications or military signals involve all aspects of communications, or conveyance of information, by armed forces. Military communications span from pre-history to the present. The earliest military communications were delivered by runners. Later, communications progressed to visual and audible signals, and then advanced into the electronic age. Examples from Jane's Military Communications include text, audio,

Communications: From Ancient Times to the 21st Century is the first comprehensive reference work on the applications of communications technology to military tactics and strategy—a field that is just now coming into its own as a focus of historical study.

Military Communications:

## **A History Of Army Communications And Electronics**

History Historically, the first military communications involved the use of runners or the sending/receiving of simple signals (sometimes encoded to be unrecognizable).

Respectively, the first distinctive tactics of military communications were called Signals, while modern units specializing in those tactics are usually designated as Signal Corps.

## **Military communications | Military Wiki | Fandom**

The early German blitzkrieg, with tank and armoured formations, placed a new order of importance on reliable radio communication. The development of the air, infantry, artillery, and armoured team created new requirements for split-second communication by radio among all members.

## **Military communication - World War II and after | Britannica**

Military communication has thus long played an important role in warfare. Early development. Messengers have been employed in war since ancient times and still constitute a valuable means of communication. Alexander, Hannibal, and Caesar each developed an elaborate system of relays by which messages were carried from one messenger post to another by mounted messengers traveling at top speed.

## **Military communication | Britannica**

Communications have always been, and are still a vital part of the Army's fighting power. Only with clear and trusted communications can commanders support, control, and lead their units and soldiers. The evolution of electrical communications in the last 150 years has been one of the most important developments humanity has ever witnessed.
