Helps your students build their knowledge of the core studies and applied topics for OCR Psychology with a clear, organised approach; activities, practice questions and extension suggestions develop the skills required at A Level - Supports you and your students through the new OCR A Level specification, with an author team experienced in teaching and examining OCR Psychology - Helps students easily navigate the core studies and associated themes and perspectives with an organised, accessible approach - Develops knowledge and understanding of all the Applied Psychology topics, with background, key studies and applications - Develops the critical thinking, mathematical and problem-solving skills required for the study of Psychology through a wealth of targeted activities - Strengthens students' learning and progression with practice questions and extension activities

This book prepares students for all the elements of the OCR AS exam. It gives the who, what, where, and even the why of each of the core studies. It also looks at some of the work that followed the studies. Specifically it covers: Core studies: an abstract of each study plus ample details of the aims, method, results and conclusions. Guidance is given on how each study can be evaluated and a wealth of extra materials provided for each study e" practical activities, discussion ideas, multiple-choice and

exam-style questions, diagrammatic summaries, further reading and video links. Background to each core study: information about related research before and after the study; and biographical details of the researcher(s). Key issues: sixteen issues are discussed to cover the themes of the course and prepare students for the long-answer questions. A 'Psychological Investigations' chapter helps students to understand research methods in psychology, necessary for the Psychological Investigations exam and also for understanding the core studies themselves. Exam guidance: short and long answer exam-style questions answered by students with examiner(s) comments. The book is presented in magazine-style spreads to aid the learning process, and has been thoroughly revised to match the requirements of the new OCR specification. The book(s) accompanying website contains Answers to all exam questions. Suggested evaluations.

Written by leading psychology authors, this textbook precisely matches the OCR AS psychology specification and has been reviewed and trialled by a panel of OCR teachers.
