Advanced Accounting, Paul M. Fischer, William J. Taylor & Rita H. Cheng, 12th Ed (TB). Advanced Accounting, Floyd A. Beams, Anthony, Bettinghaus & Smith, 12th Ed (SM & TB). Advanced Accounting, Joe B. Hoyle, Schaefer & Doupnik, 10th Ed (SM & TB). Advanced Accounting, Joe B. Hoyle, Schaefer & Doupnik, 11th Ed (SM & TB). Advanced Accounting, Joe B. Hoyle, Schaefer & Doupnik, 12th Ed (SM & TB).

Advanced Accounting delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

The approach used by Hoyle, Schaefer, and Doupnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.

In Starting Out with App Inventor for Android, Tony Gaddis and Rebecca Halsey teach the fundamentals of programming while simultaneously showing students how to create fun, useful, and imaginative apps. Because App Inventor allows students to create apps and see them running on a phone, programming becomes a personally meaningful skill. Gaddis's highly accessible, step-by-step presentation presents all the details needed to understand the [how] and the [why] but never loses sight of the fact that most novice programmers struggle with this material. His gradual approach ensures that readers understand the logic behind developing high-quality programs. Teaching and Learning Experience This program presents a better teaching and learning experience for you and your students. It will help: Engage Students with Dynamic Mobile Apps: Students not only learn how to create their own apps, they can actually see them run on their phone or the Android emulator. Enhance Learning with the Gaddis Approach: Gaddis's accessible approach features clear and easy-to-read code listings, concise real-world examples, and exercises in every chapter. Motivate Learning: When students learn they can easily create their own mobile apps, they become motivated to learn programming whether that is in the CSO or CS1 course. Integrate App Inventor in the Classroom: App Inventor can be used in a variety of ways in the classroom, and this text is designed to accommodate all of them.

Alfred Sohn-Rethel's Intellectual and Manual Labour is a major text of post-war Marxist theory with ongoing relevance to current debates about value, abstraction, and domination.

Using real-world examples to thoroughly involves readers with financial statements, Financial Reporting and Analysis, 9e builds skills in analyzing real financial reports through statements, exhibits, and cases of actual companies. Emphasis is placed on the analysis and interpretation of the end result of financial reporting and financial statements.

Covers the strategic management topics in cost accounting. This title helps students to understand about the management and the role of cost accounting in helping an organization succeed. It addresses issues such as: How does a firm compete? and What type of cost management information is needed for a firm to succeed?
