achieved good results in the establishment of agroforestry practices, such as: protective forest belts, forest farming (agricultural use of forest areas), silvopasture (forest-grassland complexes).

~~Agroforestry in Bulgaria: history, presence status and ...~~

Current extent and trends of agroforestry in the EU27. This report (updated in August 2016) is an output from work-package 1 which aims to understand the context and extent of agroforestry in Europe. In an earlier report, den Herder et al (2015) reviewed literature sources to provide a preliminary estimate of the extent of agroforestry in Europe. That report (which collected only limited data from some countries) estimated that agroforestry extends to at least 10.6 million hectares in Europe.
