A history of World War II's Operation Overlord, from the campaign's planning to its execution, as Allied forces battled to take France back from Germany. D-Day, June 6, 1944, and the seventy-six days of bitter fighting in Normandy that followed the Allied landing, have become the defining episode of World War II in the west—the object of books, films, television series, and documentaries. Yet as familiar as it is, as James Holland makes clear in his definitive history, many parts of the Overlord campaign, as it was known, are still shrouded in myth and assumed knowledge. Drawing freshly on widespread archives and on the testimonies of eye-witnesses, Holland relates the extraordinary planning that made Allied victory in France possible; indeed, the story of how hundreds of thousands of men, and mountains of materiel, were transported across the English Channel, is as dramatic a human achievement as any battlefield exploit. The brutal landings on the five beaches and subsequent battles across the plains and through the lanes and hedgerows of Normandy—a campaign that, in terms of daily casualties, was worse than any in World War Ecome vividly to life in conferences where the strategic decisions of Eisenhower, Rommel, Montgomery, and other commanders were made, and through the memories of paratrooper Lieutenant Dick Winters of Easy Company, British corporal and tankier Reg Spittles, Thunderbolt pilot Archie Maltbie, German ordnance officer Hans Heinze, French resistance leader Robert LeBlanc, and many others. For both sides, the challenges were enormous. The Allies confronted a disciplined German army stretched to its limit, which nonetheless caused tactics to be adjusted on the fly. Ultimately ingenuity, determination, and immense materiel strength—delivered with operational brilliance—made the difference. A stirring narrative by a pre-eminent historian, Normandy '44 offers important new perspective on one of history's most dramatic military engagements and is an invaluable addition to the literature of war. Praise for Normandy '44
An Amazon Best Book of the Month (History)
An Amazon Best History Book of the Year
[Detail and scope are the twin strengths of Normandy '44. . . . Mr. Holland effectively balances human drama with the science of war as the Allies knew it.]
[Jonathan W. Jordan, Wall Street Journal]
A superb account of the invasions that deserves immense praise. . . . To convey the human drama of Normandy requires great knowledge and sensitivity. Holland has both in spades.]
[Times (UK)]

During World War II, the US Army and its allies faced a formidable challenge: the need to assault Hitler's 'Fortress Europe' from the sea. As a result, during 1941/45, the US Army had to add amphibious assault to its list of combat capabilities. Officers and troops from across the US Armed Forces had to develop the techniques and technologies to assault the coasts of Axis-occupied Europe, from logistics to beach assault and beachhead consolidation, and more. In order to win and hold a contested beachhead in the face of bitter enemy resistance, the amphibious-warfare specialists played a variety of essential battlefield roles; if the US troops could not establish a beachhead quickly, they risked being thrown back into the sea. For their part, the Germans had to devise a practical defensive doctrine that made the most of the limited resources and troops available and the terrain. The German infantry defenders immediately around the landing areas had to be able to call upon support from nearby artillery, mechanized troops, and armoured forces to have a chance of containing the enemy beachhead. This illustrated study analyses the specialist beach-landing troops involved in three key battles – the Allied amphibious landings at Salerno and Anzio in Italy, and Omaha Beach in Normandy – focusing upon the US Army's various types of beach-assault specialists and their German opponents, whose combat experience and effectiveness varied considerably. Each of the three featured battles is then examined in detail, exploring how the Germans made defensive preparations; how the US troops planned to overcome them; and the immediate actions undertaken by the US amphibious specialists and their German opponents both during and following the main assault landings.

From Stephen E. Ambrose, bestselling author of Band of Brothers and D-Day, the inspiring story of the ordinary men of the U.S. army in northwest Europe from the day after D-Day until the end of the bitterest days of World War II. In this riveting account, historian Stephen E. Ambrose continues where he left off in his #1 bestseller D-Day. Citizen Soldiers opens at 0001 hours, June 7, 1944, on the Normandy beaches, and ends at 0245 hours, May 7, 1945, with the allied victory. It is biography of the US Army in the European Theater of Operations, and Ambrose again follows the individual characters of this noble, brutal, and tragic war. From the high command down to the ordinary soldier, Ambrose draws on hundreds of interviews to re-create the war experience with startling clarity and immediacy. From the hedgerows of Normandy to the overrunning of Germany, Ambrose tells the real story of World War II from the perspective of the men and women who fought it.

Stephen E. Ambrose's classic New York Times bestseller and inspiration for the acclaimed HBO series about Easy Company, the ordinary men who became the World War II's most extraordinary soldiers at the frontlines of the war's most critical moments. Featuring a foreword from Tom Hanks. They came together, citizen soldiers, in the summer of 1942, drawn to Airborne by the \$50 monthly bonus and a desire to be better than the other guy. And at its peak—in Holland and the Ardennes/Easy Company was as good a rifle company as any in the world. From the rigorous training in Georgia in 1942 to the disbanding in 1945, Stephen E. Ambrose tells the story of this remarkable company. In combat, the reward for a job well done is the next tough assignment, and as they advanced through Europe, the men of Easy kept getting the tough assignments. They parachuted into France early D-Day morning and knocked out a battery of four 105 mm cannon looking down Utah Beach; they parachuted into Holland during the Arnhem campaign; they were the Battered Bastards of the Bastion of Bastogne, brought in to hold the line, although surrounded, in the Battle of the Bulge; and then they spearheaded the counteroffensive. Finally, they captured Hitler's Bavarian outpost, his Eagle's Nest at Berchtesgaden. They were rough-and-ready guys, battered by the Depression, mistrustful and suspicious. They drank too much French wine, looted too many German cameras and watches, and fought too often with other GIs. But in training and combat they learned selfness and found the closest brotherhood they ever knew. They discovered that in war, men who loved life would give their lives for them. This is the story of the men who fought, of the marinet they hated who trained them well, and of the captain they loved who led them. E Company was a company of men who went hungry, froze, and died for each other, a company that took 150 percent casualties, a company where the Purple Heart was not a medal—it was a badge of office.

From the scaling of Pointe-du-Hoc and the assault on Pegasus Bridge, to the landings on the Utah, Omaha, Gold, Juno, and Sword beaches, this new Campaign Book for Bolt Action allows players to take command of the Allied Forces or those of the defending Axis. Featuring new linked scenarios, rules, troop types, and Theatre Selectors, this volume provides plenty of options for both novice and veteran players looking to recreate these famous battles and begin the liberation of Europe.
