The 6th edition Guides now follow the International Classification of Functioning, Disability and Health (ICF) as developed by the World Health Organization (WHO). Diagnoses for the upper extremity are now defined in three major categories: soft tissue, muscle–tendon, and ligament–bone–joint . There are now five defined impairment classes, ranging from class 0 (no objective findings and thus no impairment), to class 4 (“very severe” problem with an upper extremity impairment range ...

The AMA periodically publishes and updates a physician impairment rating guide (the AMA Guides). The 6th Edition, published in 2008, incorporates the definitions and terminology of the ICF and provides a simple means of assessment of ADLs as part of the rating process. It also has shifted the ratings criteria towards a diagnosis-based approach ...

California, the claims, legal, and judicial participants in the workers' compensation system need their own guidance on the use of the AMA Guides in these cases. The Lawyer's Guide to the AMA Guides and California Workers' Compensation, by Robert G. Rassp, is the only practical guide to help you calculate and understand permanent disability ratings under SB 899 and the AMA Guides Workers' compensation claims involving the AMA Guides will emerge that hinge on the proper use, misuse, or under-use of the Guides and on the causation of permanent disability under the apportionment statutes and developing case law. The Lawyer's Guide to the AMA Guides and California Workers' Compensation will assist you in the proper use of the AMA Guides and thus enable you to determine whether a medical report constitutes substantial evidence. In addition, there are some
