TL;DR (Too Long;

systems approach
views an

organization as an
organic and open
system made of inter-
dependent

subsystems. It was
first developed in the
1960s by Ludwig Von
Bertalanffy, Lawrence
J. Henderson, Daniel
Katz, W.G. Scott,

Systems Approach? -
ResearchGate

1. System approach
considers the
organisation as a
dynamic and inter-
related set of parts.

Each part represents
a department or a
sub-system. Each
department has its
sub-system.

Notes In

Continuous and effective interaction of sub-systems helps to attain goals of the larger system. Thus, every sub-system is a system and has sub-systems which together make an organisation a set of mutually dependent parts and their sub-parts.
