One of the areas of concentration that could appear on an AP biology exam is evolution and related processes, such as mutation, natural selection, and genetic drift. In general, evolution (or organismic evolution) is about changes in populations, species, or groups of species. More specifically, evolution occurs because populations vary by the frequency of heritable traits that appear from one generation to the next.

[Amazon.com: CliffsNotes AP Biology, 5th Edition ...](#)

The 4th edition is way too in depth for some materials and isn't necessary for the DAT (e.g. Chapter 9 Molecular Biology and a history of the experiments that lead to the discovery of DNA). Most importantly, the 4th edition skips some of the subjects that were in the 3rd edition, subjects that will show up on the DAT.

The original CliffsNotes study guides offer a look into key elements and ideas within classic works of literature. CliffsNotes on *The Giver* explores a world in which disease, hunger, poverty, war, and lasting pain simply don't exist. The members of this utopia have given up all human emotions and memories to live in a state of Sameness. Following the story of a 12-year-old boy who recognizes the hypocrisy of his community's "social order" – and who crafts a way to free everyone from the bane of Sameness, this study guide provides summaries and critical commentaries for each chapter within the novel. Other features that help you figure out this important work include Personal background on the author, Lois Lowry Introduction to and synopsis of the book Character descriptions Critical essays on the author's themes, style, language, and more Review section that features interactive questions and suggested essay topics Selected bibliography and list of critical works Classic literature or modern-day treasure — you'll understand it all with expert information and insight from CliffsNotes study guides.

"Terrifying... Eloquent... A heart-rending drama of human yearning." --New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naïveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

A brand new guide aims to help California teachers score higher on an important certification exam, in a book that includes practice questions and test-taking strategies, as well as three full-length practice exams. Original.

Provides subject reviews, test taking hints, and practice test for the advanced placement exam in biology.
