Api 600 trim chart by Alexis Vargas Sarmiento - Issuu

API 600 is only for gate valves and API 602 only covers up to CL 1500 so this valve is outside the scope of both of these standards. I realize that the trim number just indicates what material is used for the various trim components, but the questions becomes a little stickier when you consider that the charts in each of the standards for alternative trim numbers are different.
