Areas Of

When Preparing

To prepare a particular volume of a solution

that contains a specified concentration of a

solute, we first need to calculate the number of

moles of solute in the desired volume of

solution using the

relationship shown in

Equation 4.5.3. We then

convert the number of

moles of solute to the

File Type PDF

Areas Of

corresponding mass of  
solute needed.

How To Calculate Units of Concentration Once you have identified the solute and solvent in a solution, you are ready to determine its concentration.

Concentration may be expressed several different ways, using percent composition by mass, volume percent, mole fraction, molarity, molality, or normality.
