For academic medical faculty unfamiliar with national and international regulations, the prospect of initiating and managing a clinical trial can be intimidating. The development of protocols and case report forms, compliance with regulatory requirements, the monitoring of clinical trials as well as the responsibilities of documentation are just some of the tasks the sponsor-investigator is faced with. This book covers the entire spectrum of a clinical trial, reviewing the different stages step by step: financial planning, crucial aspects of trial design, the authorization process and, finally, documentation. Moreover, it contains helpful tips, a practical glossary, instructions and a large number of resources related to the relevant regulations and forms conforming to the 'International Conference on Harmonization and Good Clinical Practice'. This makes the publication at hand an essential 'cookbook' for both academic faculty new to clinical trials as well as seasoned sponsors-investigators.

The two-volume set LNCS 8547 and 8548 constitutes the refereed proceedings of the 14th International Conference on Computers Helping People with Special Needs, ICCHP 2014, held in Paris, France, in July 2014. The 132 revised full papers and 55 short papers presented were carefully reviewed and selected from 362 submissions. The papers included in the second volume are organized in the following topical sections: tactile graphics and models for blind people and recognition of shapes by touch; mobility support and accessible tourism; smart and assistive environments: ambient assisted living (AAL); text entry for accessible computing; people with motor and mobility disabilities: AT and accessibility; assistive technology: service and practice; ICT-based learning technologies for disabled and non-disabled people; universal learning design: methodology; universal learning design: hearing impaired and deaf people; universal learning design: sign language in education; sign language transcription, recognition and generation; universal learning design: accessibility and AT; differentiation, individualisation and influencing factors in ICT-assisted learning for people with special needs; developing accessible teaching and learning materials within a user centred design framework and using mobile technologies to support individuals with special needs in educational environments.

It is innate in human being to discover and explore what they do not know and the ocean is one of those. The sea covers 71% of the earth's surface. We know the five great oceans are: Pacific, Atlantic, Indian, Arctic and Antarctic but we know only the 10% of the deep sea, and we know less than 10% of the creatures that live there. Definitely one of the factors that has played as an antagonist in the knowledge of the sea, was the absence of technologies to explore the depths. Fortunately in 60 years, man has made great strides, managing to get to touch even the deepest point of the abyss, the Mariana Trench and this is thanks to modern technology as ROV. The ROVs are used in scientific research, in the Oil & Gas, defense, research for humanitarian purposes, in the construction and maintenance of marine culture, such as support to renewable energy, nuclear, in archeology, in the hunt for treasures and openings of sea mines. Many people are wondering what ROVs are and what they are used for, others are wondering how to become a 'ROV Operator'. The purpose of this manual is not only to give an answer to these questions but also to teach future ROV pilots how to become professionals marine robotics.

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Comprehensive directory of databases as well as services "involved in the production and distribution of information in electronic form." There is a detailed subject index and function/service classification as well as name, keyword, and geographical location indexes.
