This paper is an appeal to strategists to match the success in the development of operational art and joint doctrine with an equally comprehensive approach to strategic art as a distinct discipline that every strategic leader must master.

#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you 're running an entire company or in your first management job. " A must-read for anyone who cares about business. " —The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of " the discipline of execution " : the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future:

- Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge.
- Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management.
- Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation.
- Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a " vision " and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

Think Like a General...Lead Like an Executive " At their center, great organizations such as America's armed forces are the product of great leaders. This fantastic book reveals the keys to success within the military culture, as well as relevant and practical application tools for creating strong leaders today. " —Stephen R. Covey, author of The 7 Habits of Highly Effective People and The 8th Habit: From Effectiveness to Greatness What distinguishes strategic leadership? According to top U.S. Army generals, the difference lies in the discipline of thinking. Because the problems strategic leaders face are often multi-faceted and can involve ethical dilemmas, these leaders must move beyond thinking tactically and take a longer term, broader approach to finding solutions. Through the U.S. Army War College and other senior-service colleges, the Army teaches strategic thinking to its officers, developing some of the most

esteemed leaders of our time. Strategic Leadership: The General's Art provides aspiring leaders with an understanding of the behavior and competencies that make a good strategic leader. In line with the curriculum followed by senior officers attending the U.S. Army War College, this book teaches leaders how to think strategically in a volatile, uncertain environment and thereby to provide transformational leadership and shape outcomes. With contributions from senior military leaders as well as experts in the fields of strategic leadership, systems and critical thinking, and corporate culture, this invaluable reference shows readers how to move from mid-level manager to strategic-thinking senior executive. Planning today is more important than ever. Both acquisition and allocation of resources are increasingly difficult for arts organizations as a result of emerging technologies, reduced arts education, aging donors, and the advent of new forms of entertainment. It is essential for arts organizations to take a coherent approach to these issues to remain vibrant over time. In fact, most arts organizations do periodically attempt some kind of planning exercise. But a review of hundreds of such plans suggests that most contain merely a wish list, rather than concrete plans for the future: "We will increase ticket sales!" is a common "strategy" expressed in too many arts plans. In the absence of details about how ticket sales will be increased, it's an empty promise. In Strategic Planning in the Arts, Michael M. Kaiser, the former head of the Kennedy Center in Washington, DC, and an arts management guru, has produced a clear, concise guide for staff or board members of not-for-profit arts organizations who are responsible for developing, evaluating, or implementing plans. Relying on real-world cases and examples, Kaiser shows how to conceive, assess, and act on every part of the strategic plan, from the mission statement to the financial statement; from managing the board to marketing. Praise for Michael Kaiser: "A rich yet tidy cornucopia of solutions for the challenges facing the American arts scene." - Washington Post
