ArubaOS 8.6.0.0 - Aruba Networks
Multi-Version Licensing: ArubaOS 6.5.0.0 supports multi-version licensing, which allows centralized licensing clients to run a different version of the license than that of the primary and backup licensing servers. If a license is introduced in a newer version of **ArubaOS**, the primary and backup licensing servers set can still distribute licenses to licensing clients running an older version of **ArubaOS**, even if the licensing client does not recognize the newer license type.

ArubaOS 6.5.0.0 | Boochas.nl
Does **ArubaOS 6.X** will be still deployed for at least next 5 years? Or it is going to be deprecated over 5 years and master-controllers architecture will be deprecated? If master-controllers architecture will be deprecated with **ArubaOS 6** could we still user this architecture with **ArubaOS 8**, without mobility master, because my client is to small for full **ArubaOS 8** architecture deployment :(
