AUSTRALIAN STANDARDS

Provisions for residential slabs and footings are covered in Part 3.2. Under the Deemed-to-Satisfy Provisions there are 2 compliance paths for the design and construction of raft slabs: complying with the prescriptive provisions written into the BCA; or complying with the Australian Standard – AS 2870 referenced by the BCA.

OVERVIEW OF THE REQUIREMENTS FOR RAFT SLABS

Selecting the size. You do not have the Flash plugin. Selecting the size. The depth of the stump pad footing must be selected from AS 2870-1996 'Residential slabs and footings - construction'. The distance between each stump pad footing must also be considered. Site Class. Depth of pad footing (Ds) mm. A. 400.
