Produced in connection with the Royal Observatory Greenwich's Astronomy Photographer of the Year award, this wall calendar features some of the finest examples of astronomy. Informative text accompanies each work and the datepad features previous and next month's views.

A guided tour through the universe--and beyond! From the sun's super-hot core to the many moons of Neptune, we're traveling to the far reaches of our solar system and beyond! Astronomer Dean Regas presents Facts from Space!--an exciting education on everything outside our atmosphere. Inside, you'll discover space facts and celestial trivia, including: A day on Venus is longer than its year. Early space missions ejected human waste into space, where it froze into intricate crystals that still float in space today. After being in space, some astronauts returned to Earth up to 2 inches taller than when they left. The stars in the Big Dipper are shifting among themselves and will look like a "Big Spatula" by the year 75,000. And more! Packed with fascinating information, it's a stellar read for sci-fi fans and at-home astronomers alike!

Take a tour of the universe with this breathtaking collection of photographs from the archives of NASA. Astonishing images of Earth from above, the phenomena of our solar system, and the celestial bodies of deep space will captivate readers and photography lovers with an interest in science, astronomy, and the great beyond. Each extraordinary photograph from the legendary space agency is paired with explanatory text that contextualizes its place in the cosmic ballet of planets, stars, dust, and matter!from Earth's limb to solar flares, the Jellyfish Nebula to Pandora's Cluster. Featuring a preface by Bill Nye, this engaging volume offers up-close views of our remarkable cosmos, and sparks wonder at the marvels of Earth and space.

This book is uniquely about the relationship between the optical telescope and astronomy as they developed together. It covers the time between the telescope's pivotal invention in the 1600's up to the modern era of space-based telescopes. Over the intervening centuries, there were huge improvements in the optical resolution of telescopes, along with changes in their positioning and nature of application that forever altered the course of astronomy. For a long time, the field was an exclusive club for self-motivated stargazers who could afford to build their own telescopes. Many of these leisure-time scholars left their mark by virtue of their meticulous observations and record keeping. Although they would now be considered amateurs, these figures and their contributions were pivotal and are covered in this book alongside professionals, for the first time giving a complete picture of the history of telescopic science.

It's another new year celebrating everything under the Sun, including the Moon, with The Old Farmer's Almanac, America's oldest continuously published periodical! Always timely, topical, and distinctively useful, with a pleasant degree of humor, the Almanac has been beloved for centuries by people from all walks of life. As the nation's iconic calendar, the 2018 edition will mark the days, months, and seasons; preview astronomical events; and cover a range of related topics: trends, gardening, anniversaries, recipes, home remedies, pets, husbandry, folklore, amusement, contests, fishing, and more!too much more to mention!all in the inimitable way it has done since 1792.

2018 KID'S CALENDAR: SOLAR SYSTEM is a colorful "first" calendar for children. It features images of planets, comets, the sun, and Earth's moon. It is perfect for someone with an interest in space or astronomy. There is plenty of space on each calendar grid for stickers, notes, or interesting fun facts about our solar system. Why not put this calendar on a wall or in an area where parent and child can reinforce calendar features and skills taught in school? Use the "surprise me" option to view sample pages. This calendar makes a great birthday, St. Nicholas, or Christmas gift.

Founded in 1957, Chase's observes its 60th anniversary with the 2018 edition! Users will find everything worth knowing and celebrating for each day of the year: 12,500 holidays, historical milestones, famous birthdays, festivals, sporting events and much more. "One of the most impressive reference volumes in the world."--Publishers Weekly.
