Audi Navigation Plus is an in-car media and navigation system developed by Audi.

Unlike the Audi Multi Media Interface, it can not control climate, convenience, suspension or engine settings. Audi Navigation Plus units were available mostly as an optional equipment instead of standard stereo systems.

development process, this book turns the FEA into a productivity tool that will help to avoid costly and potentially dangerous mistakes. During the 50 years of its development, FEA evolved from an exotic analysis method accessible only to specialized analysts into a mainstream engineering tool.

Where To

Phenomenal progress in  
computer hardware and  
operating systems  
combined with similar  
progress in computer-

now use it during the  
product design process.  
Many books have been  
written about FEA,  
however very little FEA  
literature takes a middle

specifically addresses  
the needs of design  
engineers who use FEA  
as an everyday design

to fill that void by  
focusing on an  
understanding of FEA  
fundamentals, which are  
explained through  
simple and intuitive  
examples that can be  
used by any engineer.
