This book constitutes the refereed post-conference proceedings of the 4th EAI International Conference on Innovations and Interdisciplinary Solutions for Underserved Areas, InterSol 2020, held in Nairobi, Kenya, in March 2020. Due to the COVID-19 pandemic the conference is postponed to a later date in 2020. The 20 papers presented were selected from 50 submissions and issue different problems in underserved and unserved areas. They face problems in almost all sectors such as energy, water, communication, climate, food, education, transportation, social development, and economic growth.

Leading experts from all over the world present an overview of the use of enzymes in industry for: - the production of bulk products, such as glucose, or fructose - food processing and food analysis - laundry and automatic dishwashing detergents - the textile, pulp and paper and animal feed industries - clinical diagnosis and therapy - genetic engineering. The book also covers identification methods of new enzymes and the optimization of known ones, as well as the regulatory aspects for their use in industrial applications. Up to date and wide in scope, this is a chance for non-specialists to acquaint themselves with this rapidly growing field. '...The quality...is so great that there is no hesitation in recommending it as ideal reading for any student requiring an introduction to enzymes. ...Enzymes in Industry - should command a place in any library, industrial or academic, where it will be frequently used.' The Genetic Engineer and Biotechnologist 'Enzymes in Industry' is an excellent introduction into the field of applied enzymology for the reader who is not familiar with the subject. ... offers a broad overview of the use of enzymes in industrial applications. It is up-to-date and remarkable easy to read, despite the fact that almost 50 different authors contributed. The scientist involved in enzyme work should have this book in his or her library. But it will also be of great value to the marketing expert interested in the present use of enzymes and their future in food and nonfood applications.' Angewandte Chemie 'This book should be available to all of those working with, or aspiring to work with, enzymes. In particular academics should use this volume as a source book to ensure that their 'new' projects will not 'reinvent the wheel'.' Journal of Chemical Technology and Biotechnology

World soil health is under pressure from erosion, loss of soil organic carbon and biodiversity, pollution, and salinization.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

This book is the updated English version of the 2006 German bestseller Zellulare Diagnostik, a comprehensive presentation of flow cytometry and its applications. While some techniques of immunophenotyping by flow cytometry already are routine procedures in the laboratory, new methods for the functional characterization of cells, the analysis of rare cells, and the diagnosis of complex materials have only begun to win wide recognition. New approaches such as slide-based cytometry will lead to an increase in the use of cytometric techniques. Multiparameter approaches will further improve analysis. The book provides a comprehensive and detailed compilation of all aspects of flow cytometry in research and the clinic. For newcomers it offers a thorough introduction, for advanced users, specific protocols and interpretation assistance.

Darkly humorous, usually sarcastic, and always profane and offensive, Interviews with Dead Celebrities tears apart the pillars upon which we place celebrities, politicians, and entertainers with sharp social commentary in the form of interviews that are relentless in their pursuit of the raw, honest, (albeit completely fictional) truth. Written by humorist and comedian Adam Avitable, this book asks the questions you've always wanted to know. Why did Whitney Houston throw away her good will for drugs? Did Osama bin Laden really hate America? Can Steve Jobs tell a joke? Does Joe Paterno care about children? Would John Hughes have written a sequel to Ferris Bueller's Day Off? With over fifty posthumous interviews written entirely by Avitable, Interviews with Dead Celebrities will make you laugh, make you gasp, and may make you write him an angry letter telling him that he's evil for making you laugh. Read interviews with the following celebrities and public figures: Peter Graves, Lucille Ball, Adolf Hitler, Phil Hartman, Ed McMahon, Zelda Rubinstein, "Macho Man" Randy Savage, Sherman Hemsley, Jack Kevorkian, Barbara Billingsley, Corey Haim, Helen Keller, Leonard Stern, Osama bin Laden, Anna Nicole Smith, Gary Coleman, Heath Ledger, Patrick Swayze, Aaliyah, Tony Curtis, Greg Giraldo, Leslie Nielsen, Billy Mays, Brittany Murphy, George Carlin, Martin Luther King, Jr., Bob Guccione, Amy Winehouse, Roy Scheider, Dick Clark, Mark Twain, Elizabeth Taylor, Robert Novak, John Lennon, John Hughes, Amelia Earhart, Dennis Hopper, Michael Jackson, Oral Roberts, Farrah Fawcett, Walter Cronkite, Lisa "Left Eye" Lopes, Jack LaLanne, Kim Jong Il, Whitney Houston, Andy Rooney, Ted Kennedy, Sir Arthur Conan Doyle, Marilyn Monroe, Ronald Reagan, Joe Paterno, Nora Ephron, JD Salinger, Ray Bradbury, Princess Diana, and Steve Jobs. Adam Avitable is a blogger who has been writing at Avitable.com for thirteen years. He is a lawyer, a stand-up comedian, and a sucker for redheads. He loves bacon and chocolate but would give those up in a heartbeat just to make the world laugh until it collectively peed itself.
