One of the most important books on the modernist movement in architecture, written by a founder of the Bauhaus school. One of the most important books on the modern movement in architecture, *The New Architecture and The Bauhaus* poses some of the fundamental problems presented by the relations of art and industry and considers their possible, practical solution. Gropius traces the rise of the New Architecture and the work of the now famous Bauhaus and, with splendid clarity, calls for a new artist and architect educated to new materials and techniques and directly confronting the requirements of the age.

"Art and technology: a new unity" - It was with this slogan that the Bauhaus moved to Dessau in 1925. The seven years in Dessau were most productive for the designers and architects at the Bauhaus. This illustrated volume presents the Bauhaus buildings in Dessau in words and pictures and offers new perspectives on these icons of modern architecture. Walter Gropius, Hannes Meyer, Ludwig Mies van der Rohe, Richard Paulick, Georg Muche, Carl Fieger and Karl Friedrich Engemann: the architects at the Bauhaus in Dessau realized their designs in the industrial city between the Elbe and the Mulde rivers during the years between 1925 and 1932 and thereby created a unique ensemble of modern architecture which attracts visitors from all over the world to Dessau to this day. Since 1996 some of the Bauhaus buildings in Dessau have been regarded as key works of European Modernism and are included in the list of UNESCO World Cultural Heritage Sites. They express the revolutionary aim of the historical Bauhaus to bring about fundamental change in society through design and architecture.

Der weltweite Einfluß des Bauhauses ist vielfach untersucht und erläutert worden. Es ist heute unbestritten, daß die Ideen dieser wohl bedeutendsten Kunst- und Architekturschule des Zwanzigsten Jahrhunderts gerade in den Vereinigten Staaten einen außerordentlichen Wirkungsgrad erreichten. Allein die Skylines der großen amerikanischen Städte geben dafür ein Zeugnis. Die Frage, wie es zu dem phänomenalen Erfolg des Bauhauses in Amerika kommen konnte, wurde dagegen unzulänglich beantwortet: Der beliebte Hinweis auf die Immigrationen bestimmter Bauhaus-Persönlichkeiten bleibt eine zu einfache Erklärung. Diese Arbeit, die sich als Beitrag zur Bauhaus-Rezeptionsforschung versteht, sucht daher die für das Bekanntwerden des Bauhauses in Amerika maßgeblichen Faktoren nachzuvollziehen sowie das Image, das bestimmte Architekten des Bauhauses für die dortige Szene attraktiv machte, zu beschreiben. Diese Rekonstruktion ergibt nicht nur durch Heranziehung bislang unberücksichtigter Quellen neue Einsichten hinsichtlich des Bekanntwerdens des Bauhauses in den USA, sondern ist auch spannend zu lesen, nicht zuletzt aufgrund der Beachtung politischer Aspekte, wie der Beschattung von Walter Gropius und Mies van der Rohe durch das FBI.

An historical exploration of the Bauhaus--having existed for only fourteen years and boasting fewer than 1,300 students--assesses the school's influence throughout the world in numerous buildings, art-works, objects, concepts, and curricula. Reprint.

This book, a valuable introduction to the Bauhaus movement, is generously illustrated with examples of students' experiments and typical contemporary achievements. The text also contains an autobiographical sketch.

The fragment - an essential part of the structure which carries within it the genetic code of the whole, is in the core of this visual inquiry depicting Tel Aviv's White City. The encounter between a building style originating in Europe and the Mediterranean glare, is highlighted by the colour photography. While paying homage to the Bauhaus spirit and the avant-garde photographers of the 1920s, it is also a tribute to past ideals and present renewal, enhancing the current relevance of the Modern Movement in an exceptional urban setting. The images add up to create a portrait of a place by revealing the poetic essence of its architecture and the role light takes in shaping it.

Das Haus Am Horn, 1923 anlässlich der ersten Bauhaus -Ausstellung errichtet, ist die erste und einzige in Weimar erhaltene

Bauhaus Architektur. Mit diesem Experimentalbau präsentierte sich das Bauhaus zum ersten Mal der Öffentlichkeit. In enger Zusammenarbeit statteten es alle Bauhaus-Werkstätten komplett mit eigens entworfenen Möbeln, Textilien, Leuchten und modernstem Hausgerät aus. Jedes Detail des Hauses war eine Antwort auf die vielfältigen Fragen zu künftigen Wohnverhältnissen, die bis heute aktuell sind. Von 1924 bis in die 1990er-Jahre wurde das Haus bewohnt, verändert und erweitert, sodass sich von der Innenausstattung nur wenig erhalten hat. Das kompakte Übersichtswerk stellt die wechselvolle Geschichte dieses Hauses vor, das ab 2019 als begehrtes Denkmal besucht werden kann.00Exhibition: Haus am Horn, Klassik Stiftung Weimar, Germany (starting 18.05.2019).
