For the mono input channels, the PMH880S has a PAN (ORAMA) control which determines the position of the channel signal in the stereo main mix. The PMH660M has no PAN on the input channels, because it is a dual-mono power mixer. The BAL (ANCE) control for the stereo channels of the PMH880S corresponds to the PAN control for the mono channels. It determines the relative volume of the left and right input signals before they are routed to the stereo main output.

Hello, Let me tell you about the PMH880S. it's a console that I use for 1 year. it possde esttique a sober, the buttons are well enensemble laboris, its connectivity is superb, the amplifier 2 x 400 watts is more than enough in most cases. Behringer seems s'tre applied to develop a portable console robust, versatile and trs, you go back on the console all the CHARACTERISTICS of a much more expensive console, and Versatile is franhement surprising.

The Quantum Bomb of 2015 changed everything. The fabric that kept the universe's different dimensions apart was torn and now, six years later, the people of earth exist in uneasy company with the inhabitants of, amongst others, the elven, elemental and demonic realms. Magic is real and can be even more dangerous than technology. Elves are exotic, erotic, dangerous and really bored with the constant Lord of the Rings references. Elementals are a law unto themselves and demons are best left well to themselves. Special agent Lila Black used to be pretty but now she's not so sure. Her body is now more than half restless carbon and metal alloy machinery. A machine she's barely in control of. It goes into combat mode, enough weapons for a small army springing from within itself, at the merest provocation. As for her heart . . . well ever since being drawn into a Game by the elven rockstar she's been assigned to protect, she's not even sure she can trust that anymore either.

In the latest thriller in the #1 New York Times bestselling series, homicide detective Eve Dallas investigates a murder with a mysterious motive—and a terrifying weapon. Pediatrician Kent Abner received the package on a beautiful April morning. Inside was a cheap trinket, a golden egg that could be opened into two halves. When he pried it apart, highly toxic airborne fumes entered his body—and killed him. After Eve Dallas calls the hazmat team—and undergoes testing to reassure both her and her husband that she hasn't been exposed—it's time to look into Dr. Abner's past and relationships. Not every victim Eve encounters is an angel, but it seems that Abner came pretty close—though he did ruffle some feathers over the years by taking stands for the weak and defenseless. While the lab tries to identify the deadly toxin, Eve hunts for the sender. But when someone else dies in the same grisly manner, it becomes clear that she's dealing with either a madman—or someone who has a hidden and elusive connection to both victims. "The 50th book proves this series truly is the gold standard." — Associated Press

This book was written to lend the reader a more intimate and human view of what exploration in the Antarctic regions are really like. Daily experiences are described alongside a multitude of wonderful sketches and photographs in this work, illustrating the daily life of exploration in some of Earth's harshest environments.
