Ben Franklin and the magic squares (2001 edition) | Open ...

The methods in which Benjamin Franklin used to build his squares are not known for certain. In one of his letters to a friend (James Logan), he said that he could fill the cells of magic squares as fast as he could write the numbers. It is believed he must have discovered methods to produce his magic squares since the filling of cells are way too numerous to randomly do and embrace the magical characteristics. Techniques Franklin may have used have been suggested.

To the Future, Ben Franklin is the 59th book in the Magic Tree House Series. When the magic tree house whisks Jack and Annie back to meet Founding Father Benjamin Franklin, they're not sure what their mission is. But Ben has a mission of his own. Intrigued by Jack and Annie, he's curious to...

To the Future, Ben Franklin! | The Magic Tree House Wiki ...

Franklin's Magic Squares. Here's an amusing passage from Benjamin Franklin's autobiography: "Being one day in the country at the house of our common friend, the late learned Mr. Logan, he showed me a folio French book filled with magic squares, wrote, if I forget not, by one M. Frenicle [Bernard Frenicle de Bessy], in which, he said, the author had discovered great ingenuity and dexterity in the management of numbers; and, though several other foreigners had distinguished themselves in ...

### Franklin's Magic Squares

The text introduces Franklin as a smart, curious kid whose ideas led him to "inventing cool things"; as a witty, intelligent man whose ideas were the seeds of America's first library, fire station, and hospital; and as a "super busy guy" who amused himself during meetings of the Pennsylvania Colonial Assembly by creating magic squares.

### Ben Franklin and the Magic Squares (Step-Into-Reading ...

In 1750, Benjamin Franklin constructed the above semimagic square having magic constant 260. Any half-row or half-column in this square totals 130, and the four corners plus the middle total 260. In addition, bent diagonals (such as 52-3-5-54-10-57-63-16) also total 260 (Madachy 1979, p. 87). Describing his invention in 1771, Franklin stated, "I was at length tired with sitting there to hear debates, in which, as clerk, I could take no part, and which were often so unentertaining that I was ...
