With a hilarious, tell-it-like-it-is, girlfriend-to-girlfriend tone, author Carolyn Evans provides married women with an innovative method that is sure to breathe new life into their marital relationship. The Forty Beads Method works by dissolving the negative tension that builds around sex (specifically, the frequency with which it does or does not occur) and replacing it with the sex life you always thought you should have, which in turn creates the relationship you've always wanted. In 40 short chapters, author Carolyn Evans illuminates her readers in psychologically-savvy detail why sex is so important to the success of a marriage, and exactly how to put it to the front burner of their relationship in a playful, fun way.

The Committee on the Future of Supercomputing was tasked to assess prospects for supercomputing technology research and development in support of U.S. needs, to examine key elements of context--the history of supercomputing, the erosion of research investment, the changing nature of problems demanding supercomputing, and the needs of government agencies for supercomputing capabilities--and to assess options for progress. This interim report establishes context--including the history and current state of supercomputing, application requirements, technology evolution, the socioeconomic context--to identify some of the issues that may be explored in more depth in the second phase of the study.
