When it comes to selecting a tripod head there are two popular options for the tropical nature photographer – either a ball head or a gimbal type head. Generally speaking, if you have a lens up to the size of a 300mm f/2.8 lens you will likely choose to use a ball head.

Bird Photography Gear Guide - Glenn Bartley

Basic guidelines For general use, choose a compact 60 mm telescope with a wide angled 20x or 22x eyepiece. If you need higher power, choose a 30x or 40x eyepiece in addition to, but not instead of, the general one. The larger 75-80 mm telescopes are ideal for use in low light or from a fixed position such as a hide.
