The erebid moth *Ascalapha odorata*, commonly known as the black witch, is a large bat-shaped, dark-colored nocturnal moth, ranging from the southern United States to Brazil. It is the largest noctuid in the continental United States. In the folklore of many Central American cultures, it is associated with death or misfortune.

[Ascalapha odorata - Wikipedia](#)

So, the Black Moth is the image of the equivalent opposites -the main thing is to never think of them like insects that bring bad luck, they are representatives of the darkness that is the main ingredient of life. Because these dark beings live in the darkness, they are born in it, and they live in it, it is their natural habitat.
