This new spiritual approach to physical health introduces us to a spiritual tradition that affirms the body and enables us to reconceive our bodies in a more positive light. Using Kabbalistic teachings and other Jewish traditions, it shows us how to be more responsible for our own spiritual and physical health. Each chapter explores the meaning of traditional Jewish prayers, providing a framework for new thinking about body, mind and soul. Simple exercises and movements help our bodies "understand" prayer, and show how the body's energy centers correspond to the Kabbalistic concept of the ten divine "rays of light," the Sefirot. And meditations and visualizations allow us to further enhance our spiritual awareness. Using the structure of the Prayer Wheel, readers can move step by step toward wholeness of body, mind and spirit: Modeh Ani Awakening our body and our soul Mah Tov Creating a temple for our soul Asher Yatzar Focusing on the gift of our body Bircat HaTorah Balancing our mind through the gift of Torah Elohai Neshamah Connecting with the soul using the Sefirot Elu D'varim Walking on a God-centered path Clearly illustrated with photos and diagrams to guide readers, this active, creative approach allows us to tap the power of the Jewish tradition--to awaken the body, balance the mind and connect with the soul.

Until recently, the effortless "Zone" of peak performance was only within the reach of serious athletes. Now, with Body, Mind, and Sport, anyone can reach the Zone, regardless of fitness level. Designed to accommodate a variety of individual fitness needs, the Body, Mind, and Sport program is split into two levels. Level 1 is for non-athletes who want to improve overall fitness; Level 2 is for those who want to train for competitive or recreational purposes. Your own unique mind-body type is taken into account to guide you in achieving your personal best without stress or strain. In this revised and updated edition of Body, Mind, and Sport, fitness expert and trainer John Douillard outlines a program in which your individual seasonal constitution—Winter, Spring, or Summer—determines what exercises or sports are best suited to your mind-body type and what foods you should eat for optimum results. Using the Body, Mind, and Sport approach you can decrease heart and breath rates while improving both fitness and performance. Dozens of world-class athletes, including Martina Navratilova and Billie Jean King, have used John Douillard's expert breathing techniques, dietary recommendations, and seasonally balanced workouts. Now you can, too!
