This interdisciplinary volume comprises papers from several fields related to compaction. Topics include: soil compaction for pavements and roads; deep soil compaction by vibration, impact and underground explosion; compaction control; and compaction processes in engineering.

This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control;

and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

intelligent compaction, a new method of achieving and
documenting compaction requirements. Intelligent compaction uses
continuous compaction-roller vibration monitoring to assess
mechanistic soil properties, continuous modification/adaptation of
roller vibration amplitude and frequency to ensure optimum
compaction, and full-time monitoring by an integrated global
positioning system to provide a complete GPS-based record of the
