HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

In this much anticipated sequel to The True Meaning of Smekday, Tip and J.Lo are back for another hilarious intergalactic adventure. And this time (and last time, and maybe next time), they want to make things right with the Boov. After Tip and J.Lo banished the Gorg from Earth in a scheme involving the cloning of many, many cats, the pair is notorious—but not for their heroics. Instead, human Dan Landry has taken credit for conquering the Gorg, and the Boov blame J.Lo for ruining their colonization of the planet. Determined to clear his name, J.Lo and Tip pack into Slushious, a Chevy that J.Lo has engineered into a fairly operational spaceship, and head to New Boovworld, the aliens' new home on one of Saturn's moons. J.Lo is dubbed Public Enemy Number One, and Captain Smek knows that capturing the alien is the only way he'll stand a chance in the Boovs' first-ever presidential election. With the help of a friendly flying billboard named Bill, a journey through various garbage chutes, a bit of time travel, and a slew of hilarious Boovish accents, Tip and J.Lo must fight to set the record straight—and return home in once piece.

This volume examines the complex, contradictory discourses of hypertext. Using theoretical material from cultural theory, radical and border pedagogies, and technology criticism, the text discusses three primary ways hypertext is articulated: as automated book (technical communication), as virtual commodity (online databases), and as environment for constructing and exploring multiple subject positions (postmodern hypertext in composition and literature). I would recommend the entire book to researchers and academics who recognize the need to integrate new technologies into our classrooms and pedagogies. - Technical Communication
