Access 2007 forms tools include: The
Form command makes a basic form,
showing a single record at a time.;
The Split Form command creates a
form showing one record on top and
includes the Datasheet view of the
entire source table on the bottom.;
The Multiple Items command creates
a form that shows all records at once,
which looks similar to the source
table in Datasheet view.

~~Create a form in Access - Access -
support.microsoft.com~~

In Access 2007, a form is an object that generally serves three purposes: To allow users to perform data entry. Data can be inserted, updated, or deleted from a table using a Form object. To allow users to enter custom information, and based on that information perform a task. For example, you may want to ask a user for parameters before ...
