Bringing Nature Home: How You Can Sustain Wildlife with ...  
Bringing Nature Home is neat because it's written by an entomologist, a bug scientist. Native plants don't just provide food and habitat for native birds, mammals, and butterflies. Tallamy gets almost giddy about the cool caterpillars you'll find on the underside of an oak leaf.

Bringing Nature Home: How Native Plants Sustain Wildlife ...  
As development and habitat destruction accelerate, there are increasing pressures on wildlife populations. In Bringing Nature Home, Douglas W. Tallamy reveals the unbreakable link between native plant species and native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals.

Bringing Nature Home - Workman Publishing  
When it comes to understanding the vital relationships between native plants and the wildlife that depends on them, Doug Tallamy is the acclaimed expert. His passion for bringing nature home by exploring these interactions and how they affect animal diversity is tireless. Gardeners have engaged in a long-term love affair with exotic and non-native plants.

Bringing Nature Home: Why Native Plants Matter. Palamedes Swallowtail butterfly caterpillar on the leaf of its host plant, Red Bay (Persea species). Photo by Sharon Dolan. The science is in. If you want birds, butterflies and other wildlife, you need native plants.

► Bringing Nature Home: Why Native Plants Matter | Florida ...  
Bringing Nature Home. On March 4, 2020. Ever wonder how to bring native wildflowers, grasses, trees and shrubs into your yard? BACT invited Dave Eubanks for a free community presentation on the subject. Dave is a landscape designer who works with landowners who desire the beauty and function of native plants.

Bringing Nature Home – Barrington Area Conservation Trust  
Planting native plants in your own garden can make a real difference. In a developed landscape, natural areas are separated by roads, utility corridors, agricultural land, and residential neighborhoods – all potential barriers to the movement of animals, and the plants they depend on. Native plants in any of these settings can provide safe passage between areas of natural habitat for important pollinators and seed dispersers, giving the " web of life " a " web " of habitat to live in.

Bringing Nature Home – Shirley Heinze Land Trust  
It culminates each spring with our annual Native Plants Sale & Festival at Gilsland Farm, featuring thousands of native plants we sourced ourselves and which are perfect for your yards and gardens. The concept for " Bringing Nature Home " comes from the book of that title by Dr. Doug Tallamy, an entomologist at the University of Delaware. Dr.
