Building A Restful
Web Service

In Spring 's

Download File

PDF Building A

approach to building RESTful web services, HTTP requests are handled by a controller. These components are identified by the `@RestController` annotation, and the `GreetingController` shown in the following listing (from `src/main/java`)

Download File

PDF Building A

/com/example/rests
ervice/GreetingCont
roller.java) handles
GET requests for
/greeting by
returning a new
instance of the
Greeting class:
