Bullying has long been tolerated as a rite of passage among children and adolescents. There is an implication that individuals who are bullied must have "asked for" this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life. Although bullying behavior endures through generations, the milieu is changing.

Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication.

Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or

States has lagged behind our European, Australian, and Canadian counterparts. This book seeks to fill this void by forwarding research on bullying across contexts conducted with American participants. This book is an exciting compilation of research on bullying in school-aged youth conducted across the United States by a representative group of researchers, including developmental, social, counseling, school, and clinical psychologists. As such, it presents a picture of the complexity of bullying behaviors and offers suggestions for using data-based decision-making to intervene and reduce bullying behaviors in our nation's schools. Given the complexity of bullying and victimization, this book gives guidance for schools as they develop prevention and intervention programming for bullying. Providing a source through which school administrators can utilize the research findings, the book is divided
