cases stem from a diverse set of industry sectors and countries on different continents, reporting on best practices and lessons learned. The book showcases how BPM can contribute to both exploitation and exploration in a digital world. All cases are presented using a uniform structure in order to provide valuable insights and essential guidance for students and practitioners.

The book is devoted to mathematical foundations providing synthesis and analysis of control and adaptation algorithms targeting modern telecommunication systems (TCS). These algorithms are finding more and more applications in modern telecommunication technologies and they determine the efficiency of TCS. The concept of telecommunication management network is used as a base methodology. The most popular technologies and network management methods are discussed. They include such issues as Common Management Information Protocol, Remote Network Management Protocol Information Base, Simple Network Management Protocol, and Net Flow. The methods of state variables are used as the main mathematic approaches for simulating control tasks. It allows solving the dynamic problems in the recursive style. The decomposition theorem is used for synthesis of control algorithms. Such issues as control algorithms for system observation and system state are discussed in details. The interpretation of applicability for discussed algorithms is given. Some part of the book is devoted to methods of statistic gathering and suppressing of a priori uncertainty. They are reduced to constructing adaptive procedures and algorithms of self-organization and self-repairing for intellectual taught systems. The neural networks, multifunctional automata and Petri nets are discussed as examples. Also, tasks and problems of business processes management are shown in their connection with TCS. Our book targets on students, PhD students and professionals in the area of telecommunications. We hope it will be useful for everybody connected with the new information technologies.

"This book provides original, in-depth, and innovative articles on telecommunications policy, management, and business applications"--Provided by publisher.

Today's business environment is characterized by hypercompetition and the development of the Internet. Fierce competition between suppliers and the availability of abundant information have caused a shift in bargaining power from producers/suppliers to buyers and consumers. Consequently, Business Process Management (BPM) OCo i.e. management tool to optimize and control operations flows by viewing the transactions within and outside corporations as processes, with the focus on speedily meeting customers' needs OCo has emerged as a popular management framework. However, recent research on BPM has put too much emphasis on information sharing and the visualization of business processes using IT innovations. This book argues that BPM must be linked with existing management tools. Based on survey results of Japanese and Korean companies' BPM practices, the book demonstrates how to build BPM as a holistic management model by addressing the importance of BPM views, the effectiveness of its approach, and the latest research trends. Sample Chapter(s). Chapter 1: The Conceptual Framework of Business Process Management (116 KB). Contents: Theory and Framework of BPM: The Conceptual Framework of Business Process Management (G-Y Lee); Organic Coupling Between BPM and Management Information (R Uematsu); The Business Process Network Strategy of SMEs (S Arimoto); Global Process Management (Y Asakura); Case Studies of BPM in Japanese and Korean Companies: Business Process Innovations in Panasonic Corporation: A Case Study (M Kosuga); BPM Practices in a Japanese Company: A Case Study of Canon Co. Ltd. (Y Asakura & A Kimura); BPM Practices in a Korean Company: A Case Study of LG Electronics Co. Ltd (G-Y Lee); Business Process Management: A Case of Korea Telecommunication Co. (KT) (B Sohn); Empirical Studies of BPM in Japanese and Korean Companies: Current Status of Process Management in Japanese and Korean Companies (K Sakate & N Yamaguchi); Comparison Between Japanese and Korean Companies from the

Viewpoint of Balanced Scorecard (Y Nagasaka). Readership: Management staff in public and business corporations; academics, researchers and advanced undergraduates and graduate students in management.

"This handbook coalesces worldwide investigations, thoughts, and practices in the area of Green ICT, covering the technical advances, methodological innovations, and social changes that result in enhancements and improvements in business strategies, social policies, and technical implementations"--Provided by publisher.

This book constitutes the proceedings of the BPM Forum from the International Conference on Business Process Management, BPM 2016, held in Rio de Janeiro, September 2016. The BPM Forum aims at gathering papers that showcase fresh ideas and emerging topics in BPM. They have to demonstrate substantial potential for stimulating interesting discussions, even if they are not yet completely matured. This way, 13 full papers were selected from 106 submissions, where each paper was reviewed by four PC members and by one Senior PC member who moderated the discussion and wrote the meta-review. The selected papers in this volume cover topics related to process modeling, process execution and management aspects of the BPM discipline.

This book "provides organizational leadership with an understanding of Business Process Management and its benefits to an organization. This book also gives Business Process Management practitioners a framework and set of tools and techniques that provide a practical guide to successfully implementing Business Process Management projects. It can be used as a reference book for organizations completing Business Process Management projects and provides a holistic approach and the necessary details to deliver a Business Process Management project." -- back cover.

Electrical Engineering / Telecommunications Integrated Telecommunications Management Solutions A volume in the IEEE Press Series on Network Management Salah Aidarous and Thomas Plevyak, Series Editors In Integrated Telecommunications Management Solutions, two commercial software technologists offer you practical insights into managing the business software life cycle. This book will enable you to plan effective business solutions with the ever-changing technology requirements of the telecommunications industry. It provides the essentials for business process reengineering from a software-development perspective that transcends the search for the best technology of the day. The principles and processes of developing integrated solutions to telecommunications management problems discussed will outlast those offered by individual hardware and software technologies. An in-depth report on successful software-development solutions in a multiple-technology environment will help you to improve your own software-development practices. You will build better business solutions with guidance such as: Fundamental requirements for integrated solutions in the telecommunications industry A range of requirements and strategies for different types of technology integration from a software engineering perspective Commercially focused software development Business- and commercial-based open standards approaches Integrated Telecommunications Management Solutions is a valuable resource for technical managers, software architects, and designers who need to maintain efficient telecommunications networks on a daily basis.

Every company wants to improve the way it does business, to produce goods and services more efficiently, and to increase profits. Nonprofit organizations are also concerned with efficiency, productivity, and with achieving the goals they set for themselves. Every manager understands that achieving these goals is part of his or her job. BUSINESS PROCESS MANAGEMENT (or BPM) is what they call these activities that companies perform in order to improve and adapt processes that will help improve the way they do business. In this balanced treatment of the field of business process change, Paul Harmon offers
