Introduction. Because Code Composer Studio v4.0 (CCSv4) is now based on the open-source Eclipse 3.2 IDE, there are a number of changes between Code Composer Studio v3.x (CCSv3.x) upon which all legacy C2000 collateral is based. This wiki explains in detail how C2000 collateral can be migrated from CCSv3.x to CCSv4, and helps users get started with their first CCSv4.0 programs.

The Code Generation Tools are bundled in Code Composer Studio and can also be downloaded from: C2000 code generation tools - compiler. CLA firmware can be written using C code or assembly. The recommendation is to use C code in your firmware as much as possible. If further optimizations are necessary, then assembly code can also be used.

~~Getting Started with Simulink Support Package for Texas ...~~

I will comment that many people start with an example project and then adapt it to meet their needs. Depends on preference and how much confidence one has with the example structure that C2000 built. For documentation, you'll find most information in the datasheet and the peripheral user guides. Thank you, Brett
