This book on Management Accounting has been written to serve as a useful text for undergraduate courses in commerce and management— B.Com. (Hons.), B.Com., B.B.A., B.B.S., B.B.M., B.B.E.—offered by Indian Universities and Institutes. Besides, the students pursuing M.Com., M.B.A., M.I.B., C.A., C.M.A. and C.S. will also find the book equally beneficial for their course curriculum. **SALIENT FEATURES** • Written in a simple, lucid and easy to comprehend style, to facilitate learning even for the first time readers. • Topics have been presented and organised systematically. • Concepts are supported with numerous graphs, tables and diagrams, wherever required. • Incorporates more than 260 solved examples/illustrations/questions from previous examination papers of various universities and professional institutes. • Considerable number of objective type, multiple choice questions (MCQs), and theoretical and practical questions have been provided in each chapter for the students to learn and practice. The book has already found place in the recommended list of the UGC curriculum under its Choice Based Credit System.

Financial Accounting provides a comprehensive coverage of course requirements for students studying to appear in the Financial Accounting paper of B.Com examinations under different Indian universities, including those that have adopted the CBCS system. It also meets the requirements of students appearing in the accounting paper at the Foundation Examinations of Institute of Chartered Accountants of India, the Institute of Company Secretaries of India and the Institute of Cost Accountants of India.

Over the years Advanced Accountancy has emerged as the definitive and comprehensive textbook on accountancy as it completely meets the requirements of students preparing for BCom, MCom, MBA, BBA and professional examinations conducted by different institutions, such as the Institute of Chartered Accountants of India, the Indian Institute of Bankers, the Institute of Company Secretaries of India, and the Institute of Cost Accountants of India. New in this Edition • Basic features of the 32 Accounting Standards of India issued by the Institute of Chartered Accountants of India and 40 Indian Accounting Standards (Ind AS) notified by the Ministry of Corporate Affairs. • Updation and convergence of Indian accounting standards with international financial reporting standards. • Strengthening and updating of the text material in the light of new accounting standards. • Latest questions and problems from examinations conducted by different professional bodies and universities.

This well-known textbook provides students with the knowledge of basic accounting principles and practices in a systematic manner. The unique feature that has made this book popular among students is the simplicity of presentation which enables them to understand the subject and solve practical problems with ease. The main strengths of the book are updated text, plentiful illustrative examples and the end-of-chapter exercises with answers. The wide coverage and user-friendly approach help the book to meet the course content requirements for BCom, BBA, MCom, MCA examinations of different universities and examinations conducted by professional institutions. **KEY FEATURES** • Updated text in view of new and withdrawn accounting standards and their interpretation. • Formulation of the roadmap for convergence of Indian Accounting Standards to IFRS. • Incorporation of the New Schedule VI in place of Old Schedule VI with appropriate notes, wherever necessary. • Complete overhauling of solutions to all Illustrations and requisite changes in the answers to Practical Problems required due to the substitution of New Schedule VI in place of Old Schedule VI. • Latest questions and problems from examinations conducted by different professional bodies and universities.

The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group II volume provides a completely up-to-date scientific assessment of the impacts of climate change, the vulnerability of natural and human environments, and the potential for response through adaptation. Written by the world's leading experts, the IPCC volumes will again prove to be invaluable for researchers, students, and policymakers, and will form the standard reference works for policy decisions for government and industry worldwide.

Contemporary environmental activists and the animal-rights community are more often than not considered separate movements, despite similar goals and attitudes toward desired change in the world. A fundamental distinction is seen in the environmentalist's broad focus on an entire species, whereas animal rights activists tend to think more about the behavior of select groups of people. Thus far, uniting these two movements has proven difficult, despite their sharing of many of the same ideological sentiments. In *Eating Earth*, Lisa Kemmerer reveals a potential place of common ground for the environmental and animal-rights movements: human dietary choice. The book links environmentalism with animal-rights thinkers, by exploring the many ways that mass consumption of animal products by people is harmful to the environment. The book argues that rather than choosing to pursue separate agendas, a joint promotion of vegetarianism and veganism could lead to targeted results for both groups. Kemmerer discusses the harmful toll that the hunting and fishing industries take on ecosystems, and addresses how modern agriculture's treatment of animals is both unethical and environmentally unsustainable. Chapter topics also include movements and ideas like ecofeminism and human-population control, and their intersections with environmentalism. A brief but poignant examination of what human beings consume, *Eating Earth* shows that the issue of dietary choice deserves to be considered in a new environmental light.

*Innovations in Transportable Healthcare Architecture* is the first book to examine the ways that healthcare architecture can provide better assistance in disaster-stricken communities. Aimed at architects and other professionals working across the disaster relief sector, it provides: An overview of the need for rapid response healthcare facilities; Global case studies which demonstrate real examples; Historical perspectives on redeploys used in past military and civilian contexts; Analysis of the advantages, challenges, and opportunities associated with offsite, premanufactured healthcare facilities and their component systems, for permanent installations or reuse on multiple sites; Planning and design considerations for transportable offsite-built healthcare architecture; State-of-the-art research on pop-up clinics, truck-based configurations, ISO container-based outpatient clinical and trauma care centres, and modularized facilities for contemporary military and civilian contexts. *Innovations in Transportable Healthcare Architecture* will be an invaluable reference source for architects, disaster mitigation planners, design and engineering practitioners, non-governmental medical aid organizations (NGOs), governmental health ministries, and policy specialists across the spectrum of disciplines engaged in disaster mitigation and the provision of healthcare in medically underserved communities globally.
