

Cat Elc Extended Life Coolant

Eventually, you will unconditionally discover a supplementary experience and success by spending more cash. yet when? realize you receive that you require to acquire those all needs taking into consideration having significantly cash? Why don't you try to acquire something basic in the beginning? That's something that will guide you to understand even more in the region of the globe, experience, some places, taking into account history, amusement, and a lot more?

It is your very own period to comport yourself reviewing habit. in the middle of guides you could enjoy now is **cat elc extended life coolant** below.

During those 12,000 hours, Cat Coolants provide excellent protection against boiling and freezing to prevent component degradation. And because they're formulated specifically for the exacting standards of Cat equipment, they offer superior protection against corrosion, scaling and deposits. Cat Coolants include: Extended Life Coolant (ELC)

the life of the coolant • Ensures Cat ELC performance to 1,000,000 km (600,000 miles) or 12,000 hours Cat ELC Extender and Flush Intervals Cat ELC Extender should be added after 6,000 hours or 300,000 miles (500,000 km) of operation, and the system should be drained and flushed with clean

~~Cat ELC - Adobe~~

Cat ELC and ELI provide industry leading corrosion resistance and longer engine life. This coolant uses Organic Acid Technology (OAT) with additives extending the life of the coolant without the need for supplemental coolant additive (SCA). Conventional Coolants - Cat DEAC and Cat NGEC offer conventional coolant proven technology which is an option for customers looking for lower up-front cost.

Caterpillar uses a six-year/ 12,000-hour/600,000-mile (with a 300,000 miles inhibitor additive) period, whichever comes first, for Cat extended life coolants or coolants that meet Cat's EC-1 specs,...

~~Extended life versus regular coolants—Equipment World~~

ELC utilizes patented carboxylate inhibitors that allow the coolant to go at least 600,000 miles, 6,000 hours or 6 years before a coolant change. No SCA's are needed. A single addition of Cat Extender is all that is required at 300,000 miles, 3,000 hours or three years. It eliminates the need to use supplemental coolant additives (SCA's).
