"Reader beware--you choose the scare! GIVE YOURSELF GOOSEBUMPS! As usual, it was a pretty long day at school. So before you do your homework you decide to grab a soda. But when you open the can, out pops a genie who offers you three wishes. She seems pretty cool, so you accept. If you start out with an easy one—like wishing to be gorgeous—she turns you into something that everyone wants to see! But that something isn't exactly human. If you still think she's cool and wish to be rich, you'll definitely find out the hard way that money isn't everything. Will you get back to normal before you're "all wished up"? The choice is yours in this scary GOOSEBUMPS adventure that's packed with over 20 super-spooky endings!"

this information for execution of various tasks. Visual feedback has been used extensively for robot navigation and obstacle avoidance. In the recent years, there are also examples that include interaction with people and manipulation of objects. In this paper, we review some of the work that goes beyond of using artificial landmarks and fiducial markers for the purpose of implementing visionbased control in robots. We discuss different application areas, both from the systems perspective and individual problems such as object tracking and recognition.

Today's Web pages need to pop. Even weekend webmasters can make their site shimmy using JavaScript, a simple yet powerful programming language. This clear, jargon-free book shows you, with step by step instructions, how to add free JavaScript programs to give you menus that expand when a visitor clicks on them, images that change with a mouse roll, and pages that respond to what a user types in. This Mini Missing Manual is excerpted from *Creating a Web Site: The Missing Manual*.
