The topic of supply chain disruptions has gained prominence over the past decade as major disruptions have increased. They have been caused by everything from volcanic eruptions to floods to tsunamis to earthquakes. Surprisingly, however, natural disasters were not the causes of disruptions most mentioned by business executives.

~~Causes of Major Supply Chain Disruption~~

Abstract. The focus of business toward increasing efficiency and reducing costs has resulted in supply chains that are efficient during normal times, but at the cost of being vulnerable to disruptions. From time to time, frequent as well as rare catastrophes also disrupt supply chain operations. We collect and compile data from many sources and show that there has been a marked increase in both the frequency and economic losses from natural and man-made catastrophes.

~~Climate Change causes Supply Chain Disruptions – Elemica~~

The terrorist attacks on the World Trade Center and the Pentagon, in 2001, brought supply chain risk into sharper focus. The attacks caused widespread transportation delays, which resulted in costly inventory shortages and plant shutdowns for many U.S. manufacturers and goods shortages for many retailers.

~~Supply Chain Disruptions: Minimize the Effects | SCM~~

Supply chain disruptions also negatively impact the productivity and utilization of assets. The firm may end up with excess inventory for some products and experience stock-outs and backorders for others. Equipment over-utilization and under-utilization will be very likely, which could lead to poor asset and inventory performance.
