How Wired Camera
Systems Are Set Up

Before you dive deep into installing a wired security camera system, you first have to understand how everything is connected. Pretty much every system consists of a set of cameras and a DVR box that serves as the user interface for managing

could run a coax wire and separate power wires but most CCTV professionals choose to use “ Siamese Cable ” . Siamese Cable is a manufactured coax cable with a set of power wires attached to it.

CCTV Installation and Wiring Options

A CCTV video camera creates synchronization

Download File PDF Cctv

pulses to lock the viewing monitor on the picture. These pulses occur at a rate of 15,750 times a second. There is one synchronization pulse or (sync pulse) for each line in the picture frame. The sync pulse tells the video monitor to start drawing a video line across the picture screen.
