Free Anatomy Quiz - The Nervous System, Physiology Quiz 1

Within the central nervous system is a system of hollow cavities called ventricles. The network of linked cavities in the brain (cerebral ventricles) is continuous with the central canal of the spinal cord. The ventricles are filled with cerebrospinal fluid, which is produced by specialized epithelium located within the ventricles called the choroid plexus. Cerebrospinal fluid surrounds, cushions, and protects the brain and spinal cord from trauma.

Functions of the Central Nervous System - ThoughtCo

The central nervous system is the control center of the body, and this quiz can help test your understanding of its various functions. Some of the concepts you'll be tested on include responses...

Quiz: Nervous System

Take the Nervous System Quiz. The nervous system is responsible for our thoughts, our emotions, our senses, and our movements. The brain, nerves, and spinal cord are all members of this important process.

Nervous System Quiz - Health Encyclopedia - University of ...

Recall thatSchwann cells are the glial cells responsible for myelination in the peripheral nervous system. Myelin is lipid-rich, and on gross inspection appears white. Thus, in the 'white matter' of the brain and spinal cord, myelinated axons are the predominant neuronal cell component and most of the the nuclei that you see in white matter are primarily of glial cells.
