David R. Hakes (University of Northern Iowa) has prepared a study guide that will enhance your success. Each chapter of the study guide includes learning objectives, a description of the chapter's context and purpose, a chapter review, key terms and definitions, advanced critical-thinking questions, and helpful hints for understanding difficult concepts. You can develop your understanding of the material by doing the practice problems and answering the short-answer questions. Then you can assess your mastery of the key concepts with the self-test, which includes true/false and multiple-choice questions. Visit <http://www.ichapters.com> for more information on the Study Guide. RESEARCH METHODS AND STATISTICS: A CRITICAL THINKING APPROACH, 5th Edition, successfully illustrates the integration between statistics and research methods by demonstrating the ways to use statistics in analyzing data collected during research. Jackson's combined text adopts an inviting narrative style that speaks directly to students and draws them into the material, helping them overcome the initial apprehension they may feel at having to learn both subject areas at once. Focusing on the logic of the process and the methodology aspect of research, Jackson incorporates a student-friendly critical-thinking approach and presents examples and exercises to which students can relate. PSYCHOLOGY: CONCEPTS AND CONNECTIONS, BRIEF VERSION, will help your students make the connections between key concepts in psychology and the connections between those concepts and their own lives. Spencer Rathus's warm and engaging writing style explains the fundamentals in ways that students can understand, and then goes a step further to show how those fundamentals relate to students' daily lives. Rathus's commitment to helping students learn goes beyond the text narrative and is reflected in the text's proven active learning system, PQ4R (Preview, Question, Read, Reflect, Review, and Recite). This system is seamlessly integrated into the book's companion Connections CD-ROM, the Book Companion Web Site, and the Study Guide--all of which are FREE with every new copy of the

text. New "Learning Connections" and "Life Connections" sections in the text also include icons that cue students to interactive content on the Connections CD-ROM and the Book Companion Web Site. This seamless integration of text and technology enhances the active learning system, PQ4R, in the text, and gives students multiple ways to connect with the text's current research and relevant applications. In this edition, Rathus invites students to learn about the latest in evolutionary psychology, biology, diversity, and gender issues in psychology--in a text that is concise yet thorough.

Learn how to evaluate and apply research with the #1 nursing research book! Understanding Nursing Research: Building an Evidence-Based Practice is known for its authoritative content, a time-tested step-by-step approach, and abundant use of research examples. With improved clarity and readability, the new edition strengthens its focus on evidence-based practice to better demonstrate how the steps of the research process relate to evidence-based nursing. Written by two of the leaders in the field of nursing research, Nancy Burns and Susan K. Grove, this full-color text offers unique insights into understanding, appraising, and applying published research to evidence-based practice. Authoritative content is written by two of the true pioneers in nursing research, who offer unique, first-hand insights into the field. Research examples provide practice in working with published studies, with many of the examples including Critical Appraisal and Implications for Practice sections. A clear, step-by-step organization introduces the research process and demonstrates how this systematic framework relates to evidence-based practice. An expanded emphasis on evidence-based practice helps you develop skills in studying and appraising published research, so you are prepared for your role in working with research evidence. Enhanced coverage of qualitative research allows prepares you to approach research questions and clinical questions with an unbiased view of the researcher's methodology. Two different appraisal processes are included: A traditional in-depth critical appraisal process prepares you for graduate-level work in research. A concise, practice-focused research appraisal process equips you for quick and accurate evaluation of the applicability of research findings to clinical practice. Updated research examples prepare you for evidence-based practice by using the physiologic conditions and hospitalized patients seen in clinicals.
