Describes strategies teachers can use to promote reading comprehension in students from kindergarten through eighth grade; and includes examples of student work, illustrations, and other reference tools.

A practical, holistic approach to integrating social studies with language arts and other content areas This comprehensive, reader-friendly text demonstrates how personal connections can be incorporated into social studies education while meeting standards of the National Council for the Social Studies. Praised for its wealth of strategies that go beyond social studies content teaching—including classroom strategies, pedagogical techniques, activities, and lesson plan ideas—this book presents a variety of methods for new and experienced teachers. Key Features Thinking Ahead invites readers to link their own experiences with the chapter content before reading How Do I? boxes give explicit, step-by-step instruction that demonstrates how to implement and apply the strategies, techniques, and activities described in the chapter Making Connections activities help readers make personal connections with the material New to This Edition The Second Edition has been significantly refined to incorporate new topic coverage and strategies needed by elementary and middle school social studies teachers New sections divide and organize the text into six thematic sections: foundational concepts, planning and assessment, instructional strategies, literacy, teaching subject area content, and enhancing democracy Differentiating instruction provides an additional focus on students with special needs and differentiating instruction Additional lesson plans and examples are offered throughout the text

The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

"This book investigates the use of computer-mediated communication technologies and collaborative processes to facilitate effective interdependent collaboration in writing projects, especially in virtual workplace settings"--Provided by publisher.

Provides modern enterprises with the tools to create a robust digital platform utilizing proven best practices, practical models, and time-tested techniques Contemporary business organizations can either embrace the digital revolution or be left behind. Enterprise Content and Search Management for Building Digital Platforms provides modern enterprises with the necessary tools to create a robust digital platform utilizing proven best practices, practical models, and time-tested techniques to compete in today's digital world. Features include: Comprehensive discussions on content strategy, content key performance indicators (KPIs), mobile-first strategy, content assessment models, various practical techniques and methodologies successfully used in real-world digital programs, relevant case studies, and more. Initial chapters cover core concepts of a content management system (CMS), including content strategy, CMS architecture, templates, work flow, reference architectures, information architecture, taxonomy, and content metadata. Advanced CMS topics are then covered with chapters on integration, content standards, digital asset management (DAM), document management, content migration, evaluation, validation, maintenance, analytics, search engine optimization (SEO), security, infrastructure, and performance. The basics of enterprise search technologies are explored next, including enterprise search features, advanced search methods, and other enterprise search concepts. An accompanying book support website provides additional material such as various content templates, checklists, and content case studies; along with an illuminating end-to-end digital program case study. Enterprise Content and Search Management for Building Digital Platforms: Offers a comprehensive guide to understanding and learning new methodologies, techniques, and models for the creation of an end-to-end digital system Addresses a wide variety of proven best practices, reference architecture, and deployed techniques in content management and enterprise search space which can be readily used for digital programs Covers the latest digital trends such as mobile-first strategy, responsive design, adaptive content design, micro services architecture, and semantic search; and also utilizes sample reference architecture for implementing solutions Features numerous case studies to enhance comprehension, including a complete end-to-end digital program case study Provides readily usable content management checklists and reusable templates for defining content strategy, CMS evaluation, search evaluation, and DAM evaluation that can be found on the book support website Comprehensive and cutting-edge, this book is an invaluable reference resource for creating an optimal enterprise digital eco-system to meet the challenges of today's hyper-connected world.

4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. A favourite with both students and lecturers, *How to Do Media and Cultural Studies* provides readers with all the knowledge and practical expertise they need to carry out their project or dissertation. Giving them hands-on guidance on managing the whole process, Jane Stokes: Shows students how to identify a topic and create a research question Guides them through the research process, from getting started through to writing-up Explores a range of case studies, showing how methods have been applied by others Expanded and updated throughout, this 3rd edition now includes: Increased coverage of digital media, social media and internet research More practical exercises to help you tie media and cultural theory to your work New guidance on understanding research ethics New guidance on mixing and combining methods *How to Do Media and Cultural Studies* has inspired thousands of students and researchers to understand why studying media texts, industries and audiences is so important. It is an ideal companion for anyone conducting a research project.

EDUCATIONAL FOUNDATIONS, Second Edition, explains today's schools for those who are trying to picture themselves within the education profession. The book makes educational foundations topics relevant and personally meaningful to both young learners and mature adult learners-while also offering the comprehensive scope, scholarly depth, and conceptual analysis of contemporary issues that will help readers understand the field and transition smoothly into their career. This new edition includes a greater emphasis on InTASC and Common Core State Standards, and incorporates a number of new features that enable readers to gain a realistic and insightful perspective of the education profession. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This volume collects recent studies conducted within the area of medical education that investigate two of the critical components of problem-based curricula--the group meeting and self-directed learning--and demonstrates that understanding these complex phenomena is critical to the operation of this innovative curriculum. It is the editors' contention that it is these components of problem-based learning that connect the initiating "problem" with the process of effective "learning." Revealing how this occurs is the task taken on by researchers contributing to this volume. The studies include use of self-reports, interviews, observations, verbal protocols, and micro-analysis to find ways into the psychological processes and sociological contexts that constitute the world of problem-based learning.
