Let X = an SAT math score and Y = an ACT math score.. $X = 720$
 $720 - 520 = 15$ $720 - 520 = 15$
 $15 / 8.6 = 1.74$ The exam score of 720 is 1.74 standard

Read Book

Chapter 6

Standard deviations above the mean of 520.; $z = 1.5$
The math SAT score is $520 + 1.5(115) = 692.5$. The exam score of 692.5 is 1.5 standard deviations above the mean of 520. $X = 692.5$, $\mu = 520$, $\sigma = 115$. $z = \frac{X - \mu}{\sigma} = \frac{692.5 - 520}{115} = 1.5$. $X = \mu + z\sigma = 520 + 1.5(115) = 692.5$. $z = 1.59$, the z-score for the SAT.
