Charles Darwin: Evolution and the story of our species ...

Charles Darwin's theory of evolution by natural selection is the foundation upon which modern evolutionary theory is built. The theory was outlined in Darwin's seminal work *On the Origin of Species*, published in 1859. Although Victorian England (and the rest of the world) was slow to embrace natural selection as the mechanism that drives evolution, the concept of evolution itself gained widespread traction by the end of Darwin's life.

modern biology and the concept of biodiversity.

The Origin Of Species (Everyman's Library classics ...

On 12 February 1809, Charles Darwin, the bearded Victorian sage on the ten pound note, was born. Many people believe he was the man who discovered we come from monkeys. Yet he did no such thing. Writers before Darwin had made connections between humans and apes and monkeys because of our obvious physical similarities.
