More efficient credit portfolio engineering can increase the decision-making power of bankers and boost the market value of their banks. By implementing robust risk management procedures, bankers can develop comprehensive views of obligors by integrating fundamental and market data into a portfolio framework that treats all instruments similarly. Banks that can implement strategies for uncovering credit risk investments with the highest return per unit of risk can confidently build their businesses. Through chapters on fundamental analysis and credit administration, authors Morton Glantz and Johnathan Mun teach readers how to improve their credit skills and develop logical decision-making processes. As readers acquire new abilities to calculate risks and evaluate portfolios, they learn how credit risk strategies and policies can affect and be affected by credit ratings and global exposure tracking systems. The result is a book that facilitates the discipline of market-oriented portfolio management in the face of unending changes in the financial industry. Concentrates on the practical implementation of credit engineering strategies and tools Demonstrates how bankers can use portfolio analytics to increase their insights about different groups of obligors Investigates ways to improve a portfolio 's return on risk while minimizing probability of insolvency

Originally published in 1994, this second edition of Corrosion in the Petrochemical Industry collects peer-reviewed articles written by experts in the field of corrosion that were specifically chosen for this book because of their relevance to the petrochemical industry. This edition expands coverage of the different forms of corrosion, including the effects of metallurgical variables on the corrosion of several alloys. It discusses protection methods, including discussion of corrosion inhibitors and corrosion resistance of aluminum, magnesium, stainless steels, and nickels. It also includes a section devoted specifically to petroleum and petrochemical industry related issues.

Africa and the African Diaspora is the outcome of a symposium held atPortland State University in Portland, Oregon (February 2002), entitled " Symposium on Freedom in Black History, " designed to celebrate Black History Month. The major themes of the conference were how Africans both at home on the continent and dispersed abroad, often by forces beyond their control, reacted to oppression and subjugation in seeking freedom from slavery, colonialism, and discrimination. The volume documents the many forms that oppression has taken, the many forms that resistance has taken, and the cultural developments that have allowed Africans to adapt to the new and changing economic, social and environmental conditions to win back their freedom. Oppressive strategies as divide-and-rule could be based on any one of a number of features, such as skin color, place of origin, culture, or social or economic status. People drawn into the vortex of the Atlantic trade and funneled into the sugar fields, the swampy rice lands or the cotton, coffee or tobacco plantations of the new world and elsewhere, had no alternative but to risk their lives for freedom. The plantation provided the context for the dehumanization of disadvantaged groups subjected to exhausting work, frequent punishment and personal injustice of every kind, This book demonstrates that the history and interpretation of these struggles of the oppressed peoples to free themselves have not received proportionate attention and analysis, as have other aspects of that history.
