Sonic ethnography makes a compelling argument for taking sound seriously as a crucial component of social life and as an ethnographic form of representation. This volume explores the role of sound-making and listening practices in the formation of local identities in the southern Italian region of Basilicata. With an approach that cuts across sensory anthropology, sound studies and ethnomusicology, Sonic ethnography demonstrates how acoustic tradition is made and disrupted and acoustic communities are brought together in shared temporality and space. Based extensive research, this volume provides an innovative take on soundful cultural performances such as tree rituals, carnivals, pilgrimages and more informal musical performances, with particular attention to the interactions between classic ethnographic scholarship from the past century and the local politics of heritage. Featuring stunning colour photographs and more than an hour of sound recordings, Sonic ethnography uses a unique combination of media to investigate distinctive ways of knowing, beyond more traditional ethnographic forms of representation. Two methodological chapters, respectively on music-making as creative research practice and on photo-ethnography, make the book an essential contribution for those interested in the production of sounds and still images as relational and interactive approaches to fieldwork. The pioneering anthropologist of sound, Steven Feld, collaborated to some of the research and contributed to the book an afterword and a soundscape composition.

practice, and people. It presents the theories, tools, and strategies required to encourage and enable evidence-informed decision-making. Drawing from the experience of specialists in relevant disciplines around the world, this toolkit builds upon extensive research into the principles and skills of KT: its theory and literature, its evolution, strategies, and challenges. The book covers an array of crucial KT enablers—from context mapping to evaluative thinking—supported by practical examples, implementation guides, and references.

Opening the Black Box: Contextual Drivers of Social Accountability fills an important knowledge gap by providing guidance on how to assess contextual drivers of social accountability effectiveness. This publication aims to more strategically support citizen engagement at the country level and for a specific issue or problem. The report proposes a novel framing of social accountability as the interplay of constitutive elements: citizen action and state action, supported by three enabling levers: civic mobilization, interface and information. For each of these constitutive elements, the report identifies 'drivers' of contextual effectiveness which take into account a broad range of contextual factors (e.g., social, political and intervention-based, including information and communication technologies). Opening the Black Box offers detailed guidance on how to assess each driver. It also applies the framework at two levels. At the country level, the report looks at 'archetypes' of challenging country contexts, such as regimes with no formal space or full support for citizen-state engagement and fragile and conflict-affected situations. The report also illustrates the use of the framework to analyze specific social accountability interventions through four case studies: Sierra Leone, Pakistan, Yemen, and the Kyrgyz Republic.

The second edition of Modern Brazilian Portuguese Grammar Workbook is an innovative book of exercises and language tasks for all learners of Brazilian Portuguese. A comprehensive answer key at the back of the book enables you to check on your progress. The Modern Brazilian Portuguese Grammar Workbook is ideal for all learners who have a basic knowledge of Brazilian Portuguese, including undergraduates taking Brazilian Portuguese as a major or minor part of their studies, as well as intermediate and advanced school, adult education and self-study students.
