The Cisco IP Communicator user is relying on a unsupported VPN, and Cisco IP Communicator is integrated with a Linux-based Cisco Unified Communications Manager (Releases other than 4.x). To resolve this issue, run the Cisco IP Communicator Administration Tool on a Windows server to resolve the audio IP address auto-detection problem.

Cisco IP Communicator Administration Guide Release 8.6...

Then when I logged in as the user and checked the phone config it has got all of his lines down the left hand side with 3 of them inactive because it isn't using the "Chris IP communicator" PBT it has instead used the default IPC PBT. When I try to change the PBT to "Chris IP communicator" and update I can't do it because the user is logged in.

device profile settings for ip communicator - Cisco Community

I recently upgraded a Windows 7 Enterprise x86 machine from IP Communicator 7.x to 8.6. The upgrade appears to have resolved some issues with our headset but has introduced a whole new problem. The phone will hang on "Registering" when starting up. My workaround is to close the phone, delete the ...

Hi All is it possible to install ip communicator or soft phone in a MAC OS X. Hello- I know this is a really old post but I'm looking for an IP communicator that is compatible with call manager to install on a mac. www.sjlabs is no longer active.

IP Communicator for MAC OS X - Cisco Community

This is a simple matter of CODEC selection. IP Communicator and Skype use two very different sets of CODECs. IP Communicator 7.0 is capable of using G.722, G.711, G.729, or iLBC. All of these transmit a packet every 20ms by default. iLBC is 15.2kpbs plus overhead by default. This is your best bet but is relatively new to Cisco.
